

# Fraud Risk Assessment Workshop

**NEW**

**Evi Dimitroulia, Yiannis Vraimakis**

## Course Overview

This workshop is designed to provide professionals with a practical and structured understanding of fraud risk assessment and its role in managing fraud risk within organizations. Fraud Risk Assessment is an integral part of any Fraud Risk Management Program and a key requirement under Principle 8 of the COSO Internal Control Framework, emphasizing the need for organizations to consider the potential for fraud in assessing risks. Participants will gain insight into how fraud risk assessments are performed as a business process to identify fraud exposures, assess their likelihood and impact, evaluate existing controls, and determine appropriate responses. The workshop then focuses on the practical application of the ACFE Fraud Risk Assessment and Follow-Up Action Templates. This approach is enhanced by the Anti-Fraud Blueprint, which provides updated, practical guidance aligned with the Fraud Risk Management Guide, Second Edition (2023). Participants will gain hands-on understanding of how to use these tools to document fraud risks and controls, develop heat maps and risk rankings, identify control gaps, define response actions, and support investigation and monitoring activities within a structured fraud risk management framework.

## Who should Attend

This workshop is suitable for a wide range of professionals, including:

- Internal auditors
- Audit Committee members
- Compliance officers
- External Auditors
- Risk Managers
- Corporate governance professionals

By completing this workshop, participants will be equipped with practical knowledge and tools to perform fraud risk assessments and effectively support their organization's fraud risk management efforts.

## Course Programme

This workshop provides a practical overview of fraud risk assessment, followed by the application of structured tools to support implementation and documentation.

Key Learning Objectives:

- **Understanding Fraud Risk Assessment process:** Gain a clear understanding of fraud risk assessment as a structured and iterative process for identifying fraud schemes, assessing likelihood and significance, and supporting risk-based decision-making.
- **Identifying and Assessing Fraud Risks:** Learn how to identify fraud risk exposures across the organization, considering both internal and external factors, and assess them in a consistent and structured manner.
- **Evaluating Controls and Residual Risks:** Understand how to identify and evaluate preventive and detective controls, assess their effectiveness, identify control gaps, and determine residual risk.
- **Applying the ACFE Fraud Risk Assessment Templates:** Learn how to use the templates in practice to document fraud risks, generate heat maps and risk rankings, complete control activity assessments, and define response plans for each exposure.
- **Follow-Up Actions, Investigation and Monitoring:** Understand how to document suspected fraud cases, record investigation outcomes, and establish monitoring processes to support continuous fraud risk management.
